

Tech Tip

FROM YOUR FRIENDS AT
NEW YORK BUS SALES!

Blue Bird BBCV (Vision)/GM 8.1L Propane Engine Drivability Issues

- Complaint –** Drivability Issues, the engine stumbles and breaks down misfiring at points. There are NO Check Engine Lights and hooking to a scan tool shows NO active or logged codes.
- Cause –** The spark plugs have been changed which seems to make it run better for a length of time but then the issue reoccurs.
- Correction –** Working with CleanFuels, they suggest using a different plug. They recommend using A/C Delco #R42LS or their Platinum #41-942 and setting the gap to .045. This seems to address the issue as drivers could even notice a marked improvement in drivability immediately following the plugs being changed.
