

Tech Tip - 15-0121-1

Product Affected – All Units

One Touch Integrated Start (O.T.I.S) is the feature on the Roush propane system where the key activates a start sequence to purge propane gas from the lines and bring in liquid.

Blue Bird as an added safety feature has installed a flashing light in the engine compartment as a warning that O.T.I.S. has been initiated and that the engine will start to crank. There is a warning decal (Figure #1) above the light that is on the left side of the radiator support (Figure #2 &3).
