

Service Update 16-0201-1 A/C Install Information

New York Bus Sales installs certain A/C systems when ordered by customers on any of the products we sell. We install decals on those units providing information such as refrigerant and oil type along with the amount used.

Recently we became aware that it would be useful if we provide replacement information such as belt numbers so users could easily identify certain parts should they need replacing.

The decal shown in Figure #1 contains valuable information, not only what was previously provided, but also on the other components of the system. This tag is being on the inside of the front sign light door. Please see FIGURES #2 & #3.
