

## GM MICROBIRD FLOOR BY CONSOLE

### Tech Tip #16-0413

### **NO THERE IS NOT A FLAREBOX UNDER THE MAT**

It has been brought to our attention that something is under the GM front floor mat, just behind the “Dog House” and to the right of the driver’s seat. We checked, and found it is the “YAW” sensor for the Electronic Stability Control.

Normally on a GM “G” Series van, this sensor is located under the passenger seat. With that seat removed, it has been relocate to the current position.

**NOTE:** A yaw-rate sensor is a gyroscopic device that measures a vehicle's angular velocity around its vertical axis. The angle between the vehicle's heading and vehicle actual movement direction is the “slip angle”, which is related to the yaw rate.

**Thanks to Doug from Wheatland Chili Central School for pointing this out**
