

Alternative Fuel Excise Tax Credit Update

SALES UPDATE #21-0105

On December 27th, President Trump signed the FY 2021 Omnibus Spending Bill combined with the COVID Stimulus measures. The bill includes many clean transportation provisions including extending the key alternative fuel tax incentives through 2021.

Here are some key things to know...

- **The credit is approved through 2021**
- **Extends the VTEC credit for \$0.36 per U.S. Gallon**
- **The alternative fuel infrastructure tax credit was also extended through December 31, 2021**
 - **Fueling equipment for propane and natural gas is eligible for a tax credit of 30% of the cost, not to exceed \$30,000 per property**

This is the first time in over 10 years that the tax credit has been proactively approved ahead of schedule.

Customers that don't own their fueling station can take advantage of the infrastructure credit for on-site fueling.

Alternative Fuel Excise Tax Credit Update

SALES UPDATE #21-0105

This includes:

- \$40 million for the US DOE Clean Cities program.
- \$20 million for another round of Electric Vehicle Community Partnership grants.
- \$90 million for the EPA Diesel Emission Reduction grants.

This also directs the US DOE to develop a plan for establishing a Clean School Bus Grant Program that would prioritize school districts serving disadvantaged communities and located in air quality nonattainment areas.

This provides \$125 million for the Federal Transit Administration (FTA) Low and No Emission bus grants. It also encourages the program to support a variety of different fuel types that reduce greenhouse gas emissions.

More positive alternative fuel news to come from Blue Bird!

BLUE BIRD®

Blue Bird has produced more than 20,000 propane units to date.

New York Bus Sales has delivered over 1,000 Ford Engines to date.
