

BATAVIA PROGRESS UPDATE

Batavia, NY November 16, 2021- Progress on New York Bus Sales' new state of the art service facility in Batavia continues as the Town of Batavia has reviewed preliminary plans and responded to New York Bus Sales with comments and instructions to allow for the process to proceed.

A drilling rig is currently on site to obtain soil samples to ensure compaction is sufficient for the foundation for the planned 20,000 square foot facility which will feature 11 Service Bays, parking for 150 buses and EV charging stations. Plans call for the facility to be fully operational in the second half of 2022.
